

Final Assessment Ques no:48

-Surya P

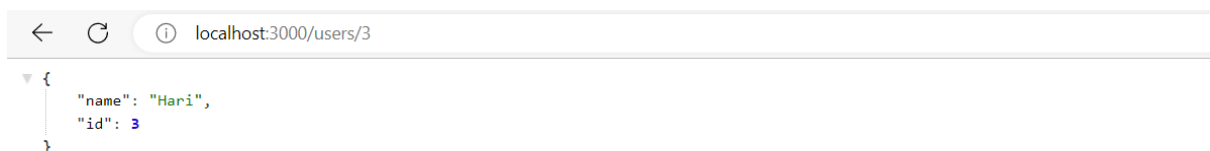

1)Getting all users:

A screenshot of a web browser window displaying a JSON array of user objects. The address bar shows 'localhost:3000/users'. The JSON data is as follows:

```
[
  {
    "name": "Surya",
    "id": 1
  },
  {
    "name": "Dave",
    "id": 2
  },
  {
    "name": "Hari",
    "id": 3
  },
  {
    "name": "David",
    "id": 5
  },
  {
    "name": "John",
    "id": 6
  }
]
```

2)Getting user by id:

A screenshot of a web browser window displaying a single JSON object representing a user. The address bar shows 'localhost:3000/users/3'. The JSON data is as follows:

```
{
  "name": "Hari",
  "id": 3
}
```
